

Energy Performance Certificate

The Manor House, Twiston, CLITHEROE, BB7 4DD

Dwelling type: Detached house
Date of assessment: 10 August 2013
Date of certificate: 10 August 2013

Reference number: 9508-5065-7228-1527-4934
Type of assessment: RdSAP, existing dwelling
Total floor area: 316 m²

Use this document to:

- Compare current ratings of properties to see which properties are more energy efficient
- Find out how you can save energy and money by installing improvement measures

Estimated energy costs of dwelling for 3 years:	£ 12,240
Over 3 years you could save	£ 5,460

Estimated energy costs of this home			
	Current costs	Potential costs	Potential future savings
Lighting	£ 636 over 3 years	£ 324 over 3 years	
Heating	£ 10,257 over 3 years	£ 5,961 over 3 years	
Hot Water	£ 1,347 over 3 years	£ 495 over 3 years	
Totals	£ 12,240	£ 6,780	

These figures show how much the average household would spend in this property for heating, lighting and hot water. This excludes energy use for running appliances like TVs, computers and cookers, and any electricity generated by microgeneration.

Energy Efficiency Rating		
Very energy efficient - lower running costs (92 plus) A (81-91) B (69-80) C (55-68) D (39-54) E (21-38) F (1-20) G Not energy efficient - higher running costs	Current 45	Potential 74

The graph shows the current energy efficiency of your home.

The higher the rating the lower your fuel bills are likely to be.

The potential rating shows the effect of undertaking the recommendations on page 3.

The average energy efficiency rating for a dwelling in England and Wales is band D (rating 60).

Top actions you can take to save money and make your home more efficient			
Recommended measures	Indicative cost	Typical savings over 3 years	Available with Green Deal
1 Internal or external wall insulation	£4,000 - £14,000	£ 3,374	✓
2 Floor insulation	£800 - £1,200	£ 479	✓
3 Increase hot water cylinder insulation	£15 - £30	£ 281	✓

See page 3 for a full list of recommendations for this property.

To find out more about the recommended measures and other actions you could take today to save money, visit www.direct.gov.uk/savingenergy or call **0300 123 1234** (standard national rate). The Green Deal may allow you to make your home warmer and cheaper to run at no up-front cost.

Summary of this home's energy performance related features

Element	Description	Energy Efficiency
Walls	Sandstone, as built, no insulation (assumed)	★☆☆☆☆
Roof	Pitched, 250 mm loft insulation	★★★★☆
	Roof room(s), no insulation (assumed)	★☆☆☆☆
Floor	Solid, no insulation (assumed)	—
Windows	Partial double glazing	★★☆☆☆
Main heating	Boiler and radiators, oil	★★★★☆
	Room heaters, wood logs	★★★☆☆
Main heating controls	Programmer and room thermostat	★★★☆☆
	Room thermostats only	★★★★☆
Secondary heating	None	—
Hot water	Oil range cooker, no cylinder thermostat	★★☆☆☆
Lighting	No low energy lighting	★☆☆☆☆

Current primary energy use per square metre of floor area: 252 kWh/m² per year

The assessment does not take into consideration the physical condition of any element. 'Assumed' means that the insulation could not be inspected and an assumption has been made in the methodology based on age and type of construction.

See addendum on the last page relating to items in the table above.

Low and zero carbon energy sources

Low and zero carbon energy sources are sources of energy that release either very little or no carbon dioxide into the atmosphere when they are used. Installing these sources may help reduce energy bills as well as cutting carbon. The following low or zero carbon energy sources are provided for this home:

- Biomass main heating

Opportunity to benefit from a Green Deal on this property

The Green Deal may enable owners and occupiers to make improvements to their property to make it more energy efficient. Under a Green Deal, the cost of the improvements is repaid over time via a credit agreement. Repayments are made through a charge added to the electricity bill for the property. To see which improvements are recommended for this property, please turn to page 3. You can choose which improvements you want to install and ask for a quote from an authorised Green Deal provider. They will organise installation by an authorised Green Deal installer. If you move home, the responsibility for paying the Green Deal charge under the credit agreement passes to the new electricity bill payer.

For householders in receipt of income-related benefits, additional help may be available.

To find out more, visit www.direct.gov.uk/savingenergy or call 0300 123 1234.

Recommendations

The measures below will improve the energy performance of your dwelling. The performance ratings after improvements listed below are cumulative; that is, they assume the improvements have been installed in the order that they appear in the table. Further information about the recommended measures and other simple actions you could take today to save money is available at www.direct.gov.uk/savingenergy. Before installing measures, you should make sure you have secured the appropriate permissions, where necessary. Such permissions might include permission from your landlord (if you are a tenant) or approval under Building Regulations for certain types of work.

Measures with a green tick  are likely to be fully financed through the Green Deal since the cost of the measures should be covered by the energy they save. Additional support may be available for homes where solid wall insulation is recommended. If you want to take up measures with an orange tick , be aware you may need to contribute some payment up-front.

Recommended measures	Indicative cost	Typical savings per year	Rating after improvement	Green Deal finance
Internal or external wall insulation	£4,000 - £14,000	£ 1,125	 D60	
Floor insulation	£800 - £1,200	£ 160	 D62	
Increase hot water cylinder insulation	£15 - £30	£ 94	 D63	
Low energy lighting for all fixed outlets	£120	£ 80	 D65	
Heating controls (thermostatic radiator valves)	£350 - £450	£ 103	 D66	
Solar water heating	£4,000 - £6,000	£ 122	 D68	
Replace single glazed windows with low-E double glazing	£3,300 - £6,500	£ 138	 C69	
Solar photovoltaic panels, 2.5 kWp	£9,000 - £14,000	£ 224	 C73	
Wind turbine	£1,500 - £4,000	£ 83	 C74	

Choosing the right package

Visit www.epcadviser.direct.gov.uk, our online tool which uses information from this EPC to show you how to save money on your fuel bills. You can use this tool to personalise your Green Deal package.

Directgov
Public services all in one place

Green Deal package	Typical annual savings
Internal or external wall insulation	Total savings of £1481
Floor insulation	
Hot water cylinder insulation	
Heating controls	
Electricity/gas/other fuel savings	£0 / £0 / £1481

You could finance this package of measures under the Green Deal. It could **save you £1481 a year** in energy costs, based on typical energy use. Some or all of this saving would be recouped through the charge on your bill.

About this document

The Energy Performance Certificate for this dwelling was produced following an energy assessment undertaken by a qualified assessor, accredited by Stroma Certification. You can get contact details of the accreditation scheme at www.stroma.com, together with details of their procedures for confirming authenticity of a certificate and for making a complaint. A copy of this EPC has been lodged on a national register. It will be publicly available and some of the underlying data may be shared with others for compliance and marketing of relevant energy efficiency information. The Government may use some of this data for research or statistical purposes. Green Deal financial details that are obtained by the Government for these purposes will not be disclosed to non-authorised recipients. The current property owner and/or tenant may opt out of having their information shared for marketing purposes.

Assessor's accreditation number: STRO002224
Assessor's name: Mr Michael Harrison DipDEA
Phone number: 07801 732 336
E-mail address: oaklodge.energy@googlemail.com
Related party disclosure: No related party

Further information about Energy Performance Certificates can be found under Frequently Asked Questions at www.epcregister.com.

About the impact of buildings on the environment

One of the biggest contributors to global warming is carbon dioxide. The energy we use for heating, lighting and power in homes produces over a quarter of the UK's carbon dioxide emissions.

The average household causes about 6 tonnes of carbon dioxide every year. Based on this assessment, your home currently produces approximately 16 tonnes of carbon dioxide every year. Adopting the recommendations in this report can reduce emissions and protect the environment. If you were to install these recommendations you could reduce this amount by 8.7 tonnes per year. You could reduce emissions even more by switching to renewable energy sources.

The environmental impact rating is a measure of a home's impact on the environment in terms of carbon dioxide (CO₂) emissions. The higher the rating the less impact it has on the environment.

Your home's heat demand

For most homes, the vast majority of energy costs derive from heating the home. Where applicable, this table shows the energy that could be saved in this property by insulating the loft and walls, based on typical energy use (shown within brackets as it is a reduction in energy use).

Heat demand	Existing dwelling	Impact of loft insulation	Impact of cavity wall insulation	Impact of solid wall insulation
Space heating (kWh per year)	51,750	N/A	N/A	(17,180)
Water heating (kWh per year)	5,480			

Addendum

This dwelling has stone walls and so requires further investigation to establish whether these walls are of cavity construction and to determine which type of cavity wall insulation is best suited.
